

Z Roofing is comprised of three active principals with combined experience of over 30 years. Our goal is to provide our customers with top quality work and excellence in client service in order to develop a long term relationship. We are a family owned company and take personal pride in everything we do and supervise all work to ensure customer satisfaction. You should be forewarned that over 95% of all roof failures are due to improper application. We recommend that you follow our Buyers Beware Guide:

1. Ask for proof of insurance and current financial statement before work starts. This will prevent liens, defaults, and bankruptcy problems from un-licensed and un-insured roofers.
2. Get several estimates, compare materials and technology. Always keep in mind a low quote is no substitute for experience and professionalism.
3. Request in writing that NO subcontractors be used on your property. This will prevent Homeowners Liability for worker injury and unsupervised quality control.

*Remember Z Roofing NEVER uses subcontractors.*

4. Call and check references, remember guarantees are only as good as the company behind them.
5. Take time to visit the Contractors office and shop. Many Contractors work out of P.O. Boxes, their home, or junkyards.

We would be pleased if you would call the references on the following pages (numerous management agencies and large accounts) to which we have provided high quality service, and who will continue to use Z Roofing, Inc., for all their roofing services, thus providing customers with reliable references.

Thank You for choosing our company,
